- **Programming Languages:** Python and C/C++
- **Web Technologies:** HTML, CSS, JavaScript
- **Tools & Platforms:** GitHub, Jupyter, VS Code
- **Operating Systems:** Windows
- **Databases:** MySQL, MongoDB
- **Others:** Power BI, Excel, MS Suite

PROJECTS

1. Personal Portfolio Website

Technologies Used: HTML, CSS, JS

Description: This website functions as a professional digital portfolio that highlights my various projects and technical expertise. With a focus on clean design and responsive layouts, the site offers a smooth user experience across all devices

2. Coder's Blog Platform

Technologies Used: HTML, CSS, JS

Description: a blogging platform tailored for coders, focusing on sharing technical insights, tutorials, and project experiences. The platform likely includes:

Blog post creation and editing, syntax highlighting for code snippets,ser-friendly interface for easy navigation

3. **Student Report Card Management System**

Technologies Used: C++ and file handling

Description: The Student Report Card Management System is a C++ console-based application designed to manage student academic records efficiently. It allows users to perform basic operations such as adding, viewing, modifying, deleting, and searching student records using their roll numbers
